HIRE EQUIPMENT CATALOGUE

SPECIALISED & CUSTOM ATTACHMENTS

ATTACHMENT		CAPABILITIES
	Excavator Mounted Diamond Saw	The diamond saws can cut vertically and horizontally from 300mm to 1200mm deep out to the boundary with complete accuracy. This allows for projects such as cutting trenches, footings and sawing into solid rock walls to be done quickly and accurately.
	Excavator Mounted Tungsten Saw	EA has a range of Tungsten Saws manufactured and designed in-house to cut through soft and medium density rock. These saws will cut up to 1500mm deep to the boundary with precise accuracy and are suitable for use in highly sensitive vibration areas.
	Twin Header (Rock Grinder)	Excavator mounted twin drum rock grinders achieve accuracy and quality end finishes on horizontal and vertical surfaces.
	Armageddon Hammer	EA carries a wide range of hammers to suit a mini 1 tonne excavator through to the 7 tonne Armageddon hammer. EA is proud to provide the Armageddon the largest silenced hydraulic hammer available in Australia for hire. Mounted on an 85 tonne excavator, the high production rates of this hammer make it a very affordable option for contractors with large scale concrete, granite and hard rock projects.
	3D GPS Systems	EA offers a large range of 3D GPS and Total Station Systems. These specialised systems give clients the flexibility to move the unit to multiple machine applications and not just the machine that it is mounted in. Our units will work with any existing systems on-site.
	Augers	A large range of Augers with various diameters are available to suit excavators from minis to 35 tonne.

CUSTOM ATTACHMENTS

Have a difficult project and need a special attachment. At EA, we recognize that time is money and as part of our complete service will custom engineer an attachment to achieve maximum productivity on your specific job. Where clients see a problem, EA see a challenge to solve it in the most efficient way and offer the unique service of manufacturing custom designed attachments.

HIRE EQUIPMENT CATALOGUE

DUMP TRUCKS

EQUIPMENT	SPECIFICATIONS	SUPPORT ITEMS & ATTACHMENTS
