

EA HIRE EQUIPMENT

About Us

EA Hire Equipment began over a decade ago supplying the civil construction industry with a comprehensive range of excavators for wet and dry hire, under the company name Excavators Australia.

Today EA Hire Equipment in conjunction with sister company, Shantfell Underground supplies total equipment hire solutions to the mining and quarry industries, tunnelling and infrastructure, rail, roads and civil construction Australia-wide.

The company's success has been built on maintaining complete control over all facets of the hire service from delivery to refuelling to providing experienced operators and on site field supervisors who ensure no downtime is lost through poorly maintained equipment.

It is this level of service combined with our philosophy of providing late model machines and the most up to date support technology that ensures Australia's major projects rely on EA Hire for all hire equipment needs.

Hire Equipment

EA Hire Equipment owns and operates one of the largest fleets of hire equipment in the country. This includes the newest machines from Hitachi, Komatsu and Caterpillar, many equipped with the latest in 3D GPS systems to ensure maximum productivity on your project.

All EA Hire Equipment equipment is fully maintained in-house to ensure optimum performance.

The construction, quarry and mining industries have not only come to rely on our extensive equipment range but our unique ability to custom engineer attachments to suit a specific job.

With both wet or dry hire, our own transport and refuelling fleets, EA Hire can provide a complete equipment package for your next project Australia-wide.

Shantfell Underground

Shantfell Underground offers the largest fleet of specially modified tunnel and shaft excavators in Australia. Our team of operators is fully trained and experienced in underground and shaft work. Utilising the latest in 3D Guidance systems, we can ensure precise accuracy on walls and increased productivity on your project.

Specialised & Custom Attachments

Our equipment is backed up with a comprehensive range of specialised attachments including the most powerful silenced hydraulic hammer available in Australia.

Nicknamed the Armageddon, this hammer is exclusively owned and available to hire through EA Hire Equipment.

Other specialised attachments include diamond blade saws, zero swings, excavator mounted rock saws and the 3D Guidance System. This unique underground guidance system was designed and engineered exclusively and is only available for hire through sister company, Shantfell Underground.

Have a difficult project, need a special attachment, at EA Hire Equipment, we recognise that time is money and as part of our complete service will custom engineer an attachment to maximise productivity on your specific job.

Wet & Dry Hire

EA Hire Equipment offers suppliers flexible agreements for both wet & dry hire service.

Our operators are experienced in a range of works from general earthworks, pipelines, rail, and freeways to specialised tunnel, shaft and rock projects for the quarry and mining industries.

Wet hire clients' can be assured our experienced team of operators will achieve your task in the safest and quickest time possible.

Whether it be a short term rental arrangement for a single machine to long term leases on a fleet of machines, EA Hire provides reliable low houred equipment at cost effective rates.

On Site Supervisor & Service Support Vehicles

All hire equipment is backed up with a team of field supervisors on site daily. This ensures our ability to minimise downtime by pre-empting any machine issues and ensuring servicing is conducted rapidly and responsively.

OH&S Policy

EA Hire Equipment is committed to consultation and cooperation between management and employees. This commitment extends to ensuring as far as practicable that the company's operations do not place the local community or others at risk of injury, illness or property damage.

Heavy Equipment Haulage

With our own transport fleet, all machinery is able to be quickly and easily delivered to your site anywhere in Australia at a cost effective rate.

On-site Refuelling

EA Hire Equipment also offers on-site refuelling. Our fleet of trucks will service both wet and dry hire clients' nationally.
